

# Nevada has Serious Job and Economic Problems. No one has come forth with a sustainable solution until now.....

The NV4CFE Energy Park with Nevada Permanent Fund Dividends Plan goes beyond past/current political thinking that focused on the “Yucca Problem” as being only a Long-Term spent fuel repository and concern over transportation/safety issues.

- **We agree with SEN Harry Reid** and others against “Yucca” as currently designated for only being a Long-Term spent fuel Repository – that’s a bad idea that never made any technical or business sense for Nevada. NV4CFE (made up of successful independent business people with no ties to any energy), has a totally new Plan that leverages Yucca “assets” to help bring economic vitality and enable creation of high-paying, high skilled jobs critical to Nevada’s future -- and it is worthy of further investigation.
- **This comprehensive [Nevada Energy Park with a Permanent Fund] Plan** brings key ingredients for generating the broad, statewide citizen support needed to enable sustainable success through the creation of a state-wide platform for a New Energy Industry with meaningful jobs creation .
  - Annual Dividend Payments of ~ \$1Billion to our state for education/infrastructure use
  - Annual Dividend Payments up to \$2,500 directly to Nevada families
  - Engages resources of UNR, UNLV and other high-level institutions and agencies
  - Initial (1-3 years) high-quality jobs in excess of 1,500 just related to Yucca alone
  - Later (> 3 years) high-quality jobs throughout Nevada in excess of 10,000 state-wide
  - All city & county opportunities to participate and enjoy a new form of economic revitalization
  - Positions Nevada as “the place to be” for all forms of energy Research & Development
  - Defines Nevada as having a balanced (all viable forms of carbon-free energy including low-cost nuclear) development and deployment portfolio – this positions Nevada for success as a Net Energy Exporter by using the preferred “24x7 baseload reliability platform”
- **Over 25 years of technological advancement** have mitigated much of the previous spent fuel/waste transportation safety concerns. Any remaining issues will be addressed during the licensing and negotiating process and no agreement would be signed until our elected state leaders are satisfied with transportation, storage, safety, reprocessing, research & development and economic provisions.
- **It’s time Nevadans look beyond past flawed politics and the original [wrong] plan for Yucca** and start anew to create a “jobs and economic growth engine” for the sustainable benefit of all Nevada.

## 1 Nevada to Initiate, and Complete Negotiations with DOE / Feds

NEVADANS  
4 CARBON FREE ENERGY

In just 25 minutes,  
we can help you learn more about Plan details!  
Contact NV4CFE at [www.nv4cfe.org](http://www.nv4cfe.org)  
to arrange for a Presentation and discussion.

## 2 Grow the Park within Nevada creating 1000's of Jobs

## 3 Net Energy Exporter (> 15 years)
